

RAINBOW COLORS - ROY G. BIV

Isaac Newton
Born: January 4, 1643
Died: March 20, 1726

Isaac Newton, the gravity guy
Saw a rainbow in the sky
With red on top and six below
Seven colors – Here you go!

Roy Red orange yellow

G. Green

Biv Blue indigo violet

Note: Roy G. Biv is a mnemonic for remembering the colors of the rainbow from top to bottom. Isaac Newton added indigo (a deep blue) to the spectrum because he liked the number seven.
